

Zaptec Column Premium

Zaptec Column Premium is a high-quality column designed for the effortless mounting of Zaptec Pro charging stations in open landscapes. Plan your electric car charging experience with stylish expression.

The column is powder coated with a black front cover that is quickly removed to get to the connection box. Mounting the column to the ground is easily done by using the 4 bolt holes at the bottom that are made for the standard CC160 base.

Zaptec Column Premium comes in grey and black and in two variants - Single and Twin. With the Single Column, you can mount one Zaptec Pro charging station to each. If, however, you want more flexibility, the Twin Column will allow you to mount two Zaptec Pro chargers to each column.

Down to the details
